- Complete LADWP Projects
- LA River Revitalization Proposed Projects

ACCESSIBILITY

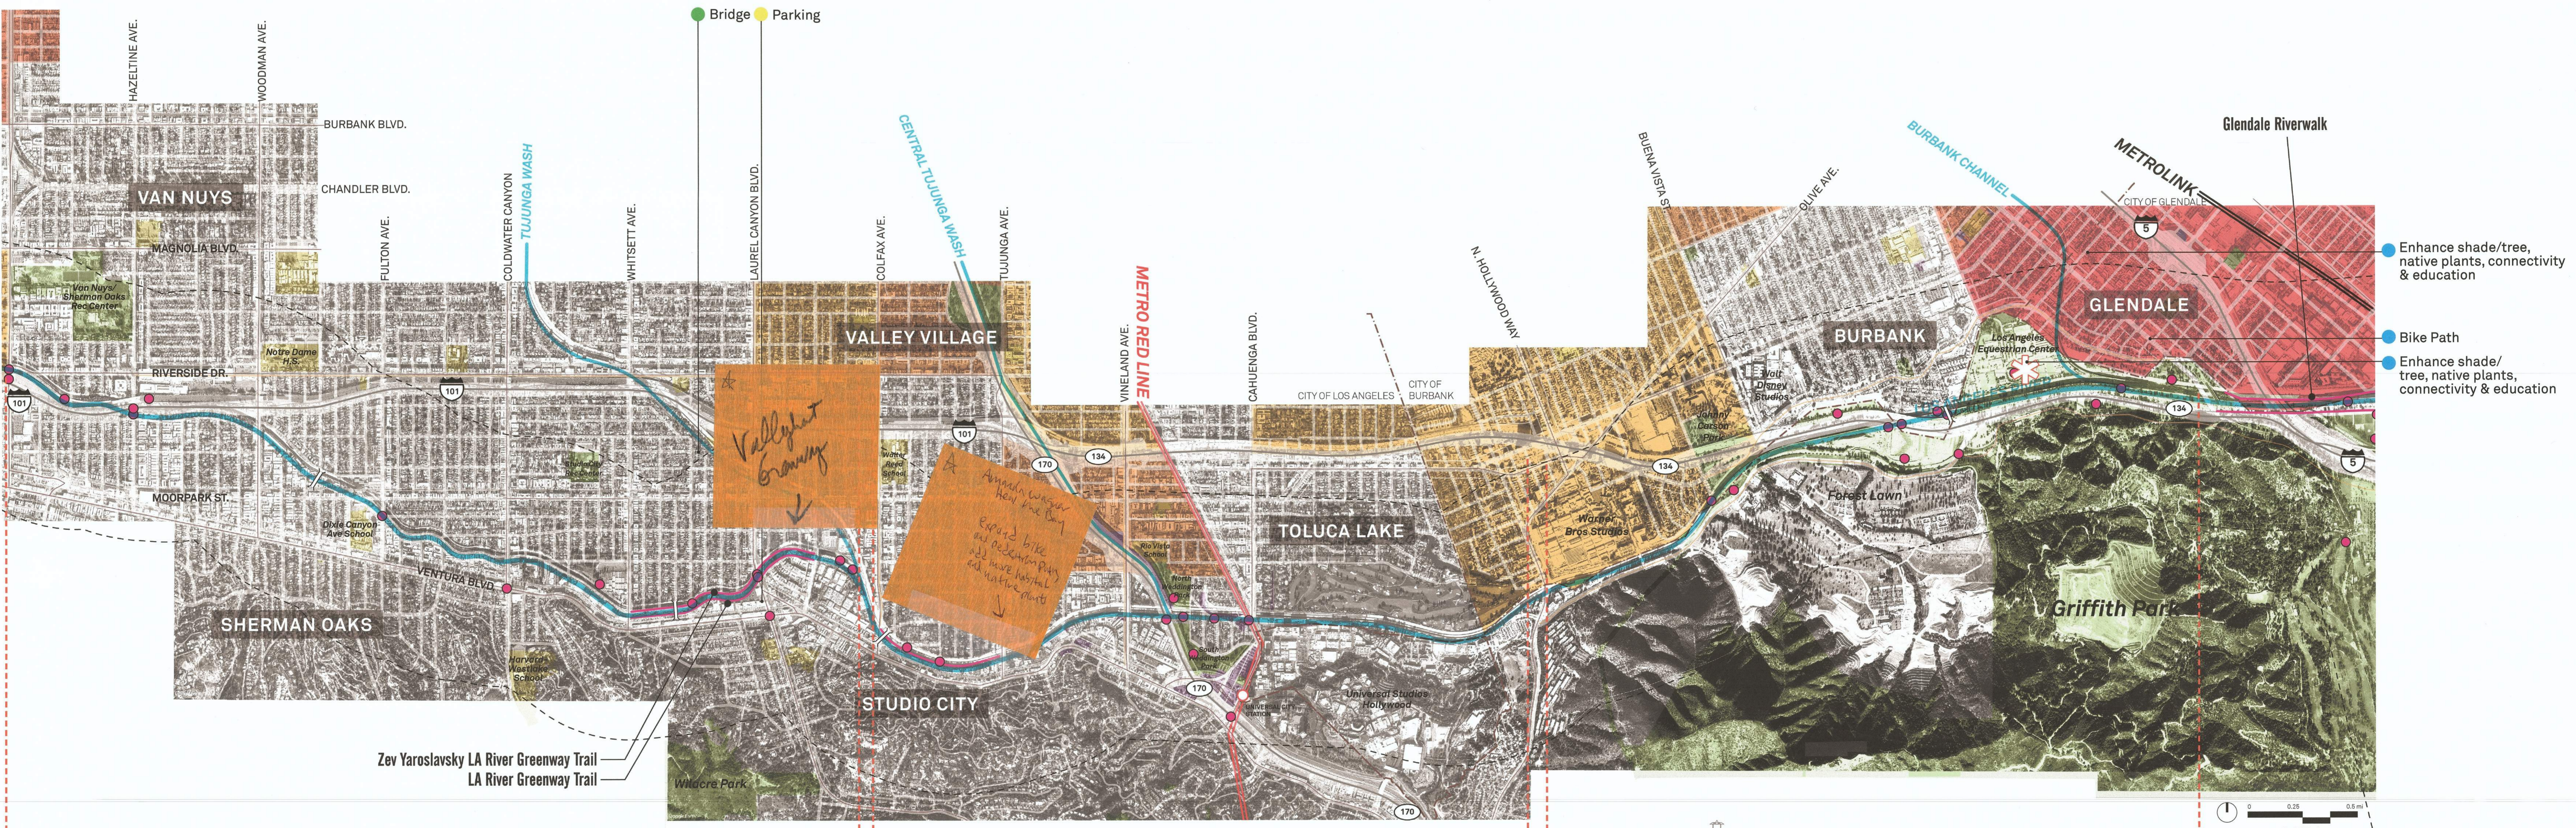

- Tributary Bike & Pedestrian Path
- Pedestrian Bridge Over Tributary
- Bike Lane
- METRO Bus Route

DISADVANTAGED COMMUNITIES¹

- CAL ENVIROSCREEN²
- 91-100% (Highest Scores)
 - 81-90%
 - 71-80%
 - 61-70%

¹ Disadvantaged communities are communities designated by CalEPA, pursuant to Senate Bill 655. Disadvantaged communities are identified by census tract and are those that scored at or above the 75th percentile in CalEnviroScreen.

² State of California, CES 3.0. CalEnviroScreen was developed by the Office of Environmental Health Hazard Assessment to identify communities in California most burdened by pollution from multiple sources and most vulnerable to its effects, taking into account socioeconomic characteristics and underlying health status.

LA RIVER CHANNEL CONDITIONS

REACH 3
5.0 miles

Reach 3
Sepulveda Dam to Confluence with Tujunga Wash
Downstream of Sepulveda Dam, the River is constrained within a rectangular channel ranging in width from 45 to 60 feet. Surrounding land uses are primarily residential. Valley Heart Drive parallels the River continuously beside most of this reach. Peak water flow velocities in this reach range from 20 to 25 cubic feet per second, during storm events.

REACH 4
3. miles

Reach 4
Tujunga Wash to Barham Boulevard
The River is a concrete-lined rectangular channel, approximately 15 feet deep and with a bottom width that ranges from 60 to 160 feet. The channel right-of-way is very limited, extending only two to four feet outward from the top of the bank. Peak flow velocities range from 30 to 34 cubic feet per second, during storm events.

REACH 5
2. miles

Reach 5
Barham Boulevard to Burbank Western Channel
From Barham Boulevard to the confluence of the Los Angeles River with the Burbank Western Channel, the River is a concrete-lined rectangular channel approximately 130 feet wide. Flow velocities in this reach also exceed 30 feet per second, during storm events. Riverside Drive parallels the River on the south side, while the north bank borders the City of Burbank.
